ph: 07 5590 7927 Fax: 07 5590 7291 Mobile: 0431 171 335

The first thing you need to know about Arianrhod's all natural aluminium free deodorant is that it really does work. With added colloidal silver, which is a natural antibacterial agent and sodium bi-carbonate to help keep you dry, this aluminium free deodorant out performs most other natural aluminium free deodorants available on the market today.

Arianrhod Aromatics has used a unique base of purified rainwater infused with amethyst, rose quartz and clear quartz crystal, aloe vera juice and witch-hazel to which cold pressed Australian hemp seed oil, well known to be antibacterial and antifungal, has been added making this a very effective deodorant, even without the addition of essential oils.

Help make poverty history while enjoying the world's healthiest oil.

Extra Virgin Coconut Oil

Niulife's certified organic and fair trade Extra Virgin Coconut Oil is bringing 'new life' to South Pacific producers and to Australian consumers.

Use it for your daily cooking and body-care needs and discover for yourself one of nature's most amazing health foods.

Their organic Coconut Flour is the gluten-free, high-fibre alternative that actually tastes good.

Ask for Niulife products at your local health store or buy online at www.niulife.com – books and skin care products available too.

Niulife is supplied by Kokonut Pacific Pty Ltd

Tinted moisturiser with sunscreen

This could be the mother of all moisturisers. A safe alternative sunscreen free from chemicals and in a light certified organic base that is non-greasy, non-toxic with an estimated SPF of 15. Independently tested by Sydney University, Mukti's new tinted moisturiser with sunscreen took five years to research and formulate. Unlike standard sunscreens that contain a bevy of toxic ingredients this product protects you from the sun as well as unnecessary chemicals. The key sun protecting and active ingredients include zinc oxide, green tea extract, rosehip and calendula extracts.
